### AMERICA'S SOURCE FOR PREMIER & INNOVATIVE FASTENERS

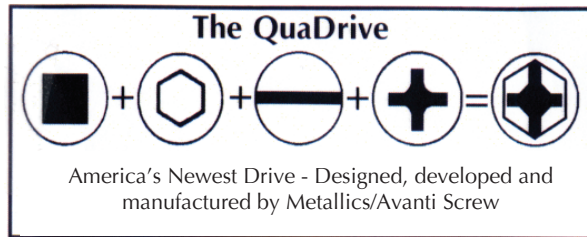

Metallics and Avanti Screw, Inc., prime American manufacturers of fastener products, have always worked to present the latest in fastener technology to our distributors and their contractors/users.

**ONLY  
METALLICS**

A Modern Up to Date Roll Threading Machine at our Affiliate, Avanti Screw.

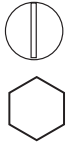

Hex Washer Head fasteners have historically only offered three drives--the hex, phillips and the slot. In 1999, we introduced "The QuaDrive" (square, hex, slotted and Phillips) in fourteen of the most popular sizes of sheet metal screws.

These sheet metal screws are being manufactured to fill the need of the growing demand in the North American markets.

Please note: We recommend driving these sheet metal screws with the above special hex driving tool. The slotted, Phillips, hex and square drives make it convenient for disassembly.

# SCREWS

A Double Lead Thread means  
twice the driving speed!

AMERICA'S SOURCE FOR PREMIER & INNOVATIVE FASTENERS

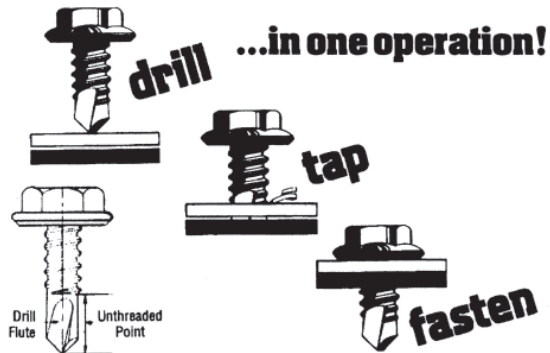

## HELPFUL HINTS: FROM METALLICS

Selecting the proper fastener for each application is important in obtaining maximum performance.

**Point Length** — Length of the unthreaded point — must be greater than total thickness of material to be drilled. In jobs involving more than total thickness of material, calculation of total thickness must also include any spaces between thicknesses.

**Driving Technique** — Keep the driving tool perpendicular to working surface.

**Drivers** — Fasteners should be installed with 2500 RPM high-torque drivers equipped with a positive clutch. For wood to steel applications, drivers operating at 1700-2000 RPM should be used.

### TRAXX™ HEAVY DUTY TEK SCREWS

HEAVY DUTY STEEL-TO-STEEL APPLICATION

Self-drilling fasteners for structural steel or bar joists up to 1/2" thick  
Milled drill point • Climaseal™ Finish

- Unique double fluted point dramatically improves drilling performance over conventional TEK screws.
- Attaches items directly to structural steel or bar joist.
- Climaseal™ finish resists corrosion.
- Engineered for faster drilling with less effort.
- The only fastener recommended for hanging jack chain without pre-drilling.
- We recommend using W113 Fender Washer 1/4 x 1 with Traxx™ to ensure proper grip on jack chain.
- Meets ICBO approvals

## CONSTRUCTION FASTENERS • IN SQUARE PLASTIC JAR TRAXX™ WOOD TO METAL FASTENERS

FAST, EFFICIENT ATTACHMENT OF WOOD TO STEEL FRAMING WITH NO PRE-DRILLING.  
MUST BE USED IN 16 GAUGE STEEL OR GREATER FOR ENGAGEMENT.

- Patented convex point has precise cutting edges to improve drill performance with less effort.
- Special winged fasteners ream a hole in wood preventing thread engagement during drilling.
- Wafer head design has a large bearing surface ideal for plywood.
- Flat head design countersinks and seats flush in wood.
- Climacoat™ finish resists corrosion.
- Specialty screw in packages of 50.

#### PACKED WITH PRIDE

As a part of our Quality Program, each shipment and each single carton leaving our facilities has a label affixed to it, indicating the person who packed the order.

#### HARD BODY PACKING

With the initiation of Hard Body Packing in 1993, not one single shipment has been rejected by a distributor because of damage in over fourteen years!

When you, the distributor, compare price and performance to other fastener suppliers, please compare our Hard Body Packing to the way they ship products.

We do it the right way--the quality way.

500 & 1000 PACKS SUPPLIED IN JARS

Our persistence and determination to ship the same day and maintain the highest fill rate in America among fastener suppliers to the distributor market is not by accident. In all our management offices, this quotation is displayed:

*Nothing in the world can take the place of persistence.  
Talent will not; nothing is more common than unsuccessful men with talent.  
Genius will not; unrewarded genius is almost a proverb.  
Education will not; the world is full of educated derelicts.  
Persistence and determination alone are omnipotent.*

- Calvin Coolidge

**The secret is out: "Our motivation starts at the top."**
